REVI 260 - CCTV Equipment

This version of the portable colour CCTV camera system is intended for inspection of house sewerage including connections in the range of DN 50 - 300. The camera is pushed into the pipeline manually using a reinforced push-rod. Pely cases proof against water splashing are available in three versions - with USB output, SD memory card or PC. Another option is the compact ReBoss USB with or without integrated battery. The camera head with sapphire cover glass has a "Rolmatik - artificial leveling" system. The winch is equipped with an integrated brake and electronics, e.g. for measuring the length of the unwinded push-rod.

Option: Rotary camera head
