IBOS KOMBO
 – suction and high-pressure superstructure

Reliable help for intake of sludge and high-pressure cleaning of pipes is represented by the superstructures IBOS KOMBO. Our company produces the custom-tailored superstructures according to customer wishes. You can choose from different volumes of tank, various power of single units and equipment.

The installation is made on 2-, 3- or 4-axle chassis according to the transported load. The tank can be divided by fixed dividing wall on the sludge and water part, or you can choose the movable partition with adjustable tank dividing. The quality is guaranteed thanks to use of high-quality components as Jurop, Speck, Pratisoli, etc. and complete production made by our practised employees.

Our sales representatives help you to assemble the vehicle, which will exactly fit to your requirements and will carry out the work with maximal efficiency.

IBOS arm

Vacuum pump
